

Board Report – Medical Staff Association – January 2026
Submitted by: Dr. Leigh Wahay

Surge Activity

Over the holiday period, the hospital experienced a significant surge in patient volumes. Many physicians worked extended hours to meet clinical demands and ensure continuity of care. We are now gradually returning to typical winter activity levels; however, a high burden of respiratory illness remains ongoing.

Meeting Times

On January 15, 2026, the Medical Staff Association trialed a new meeting time of 3:00 p.m. to encourage increased participation and attendance. This change was well received, with improved turnout, and the new meeting time will be continued going forward.
