

## Diagnostic Imaging (Estimated) Wait Times

As of November 17, 2025

| Test/Procedure                                             | Estimated Wait Time                                                         | How are we doing?                                         |
|------------------------------------------------------------|-----------------------------------------------------------------------------|-----------------------------------------------------------|
| <b>MRI non contrast</b>                                    | Approximately six (6) weeks                                                 | Decrease from three (3) months                            |
| <b>MRI contrast</b>                                        | Approximately two (2) months                                                | Decrease from three (3) months                            |
| <b>Elective General Ultrasound</b>                         | Approximately two (2) months                                                | Decrease from four (4) months                             |
| <b>Diagnostic Mammography</b>                              | Approximately two (2) weeks                                                 | No change.                                                |
| <b>Ontario Breast Screening Program (OBSP) Mammography</b> | Approximately five (5) months (for called in appointments and requisitions) | No change.                                                |
| <b>CT urgent/semi-urgent</b>                               | No wait time for P1, P2                                                     | -                                                         |
| <b>Elective CT non contrast</b>                            | approximately eight (8) months                                              | Decrease from nine (9) months                             |
| <b>Elective CT with contrast</b>                           | approximately six (6) months                                                | Decrease from nine (9) months                             |
| <b>General X-ray</b>                                       | approximately two (2) weeks<br>(no wait time for urgent/semi-urgent.)       | Decrease from approximately five (5) weeks                |
| <b>Bone Mineral Densitometry (BMD)</b>                     | Wait time information not available.                                        | BMD tests are performed on a regular basis 2-3 days/week. |

|                         | ECG                  | Blood Pressure Monitoring (BPM) | Stress Test  | Holter Monitor                                              |
|-------------------------|----------------------|---------------------------------|--------------|-------------------------------------------------------------|
| <b>Smiths Falls</b>     | Next Day             | Three (3) days                  | N/A          | 24-48 hrs: Five (5) days<br>7-14 days: Next day             |
| <b>Perth</b>            | Next day             | One (1) week                    | One (1) week | For 7-14 days: Next Day<br>24 – 48 hrs: Three (max. 3 days) |
| <b>Other:</b>           |                      |                                 |              |                                                             |
| <b>Echocardiography</b> | Approx. one (1) week | Decreased from two (2) weeks    |              |                                                             |

Please note that **out-patient X-ray exams** are scheduled from 8 a.m. to 4 p.m. Monday – Friday in Smiths Falls and Monday – Sunday in Perth.

Like the triage process in the Emergency Department, the Diagnostics Imaging Team (DI Team) receives and reviews all test requests and requisitions to determine level of urgency. **The DI Team always sets aside time to support inpatient and urgent test requests.** If you are concerned about the wait time for your appointment, please contact your primary care provider for more information.
